WINTER BOOTS (AW21)

Our harsh winters of yesteryear have been replaced by less cold winters. The «Eskimo» boots lined on the outside and on the inside are ideal for cool, dry weather! A fun, relaxed piece that protects from the cold but remains light and comfortable to wear all day.

Our concept is against the current of classic models of winter boots, uniforms with brown or Belgian, black. Our collection is inspired by warm materials that remind us of the softness of childhood and the texture of the countryside ... We let's look for the childish, cheerful, tender style. Each piece offers a sober design combined with different materials in childish colors: Orange like duck feet; a soft gray like the fur of a baby seal ...
