Beautiful nappies
which are **gentle**
on your baby's skin
as well as the environment

We are KOLORKY

KOLORKY nappies are available in various designs and sizes so you can find the best fit and style for your baby. Our characteristic black and white packaging emphasizes the gorgeous designs and colours of our products. **KOLORKY** is the only nappy maker in the Czech Republic that varies the designs in their range. We are constantly adding to the collection.

Feel safe with **KOLORKY**

KOLORKY do not cause rashes, allergy or asthma. They do not contain substances and material which may be harmful such as:

- **phthalates** which can lead to respiratory problems, allergies and even infertility
- **polyvinyl chloride (PVC)** which may contain toxic chemicals
- **latex** which may cause allergic reactions
- **chlorine and its derivatives**
- **additives** such as perfumes, deodorants and antioxidants which may irritate your baby's skin

Style, comfort, and a **respect** for nature

KOLORKY nappies are produced from natural and renewable materials. They are whitened using the TCF method, not bleach. They don't contain chlorine, harmful plastics or perfumes. Thanks to their material and its permeability, KOLORKY are ideal for extra sensitive skin. What's more, they look great! A nappy is the basis of your baby's wardrobe. That's the main reason we are constantly adding designs to our KOLORKY collection.

KOLORKY are 70% biodegradable within 4 to 5 years. They are fabricated from pulp, non-woven fabric, LOPE and SAP gel. Our packaging is also produced from bioplastic which completely decomposes into harmless substances over time.

Our nappies are dermatologically tested and certified by the Czech National Institute of Public Health – NIPH and produced by our partner factory in China. The materials and the production process are carefully and regularly monitored.

Our certifications:

You will love them

KOLORKY are remarkable for their beautiful design which is emphasised by our signature packaging. Stay tuned because we often release new designs. Do mums and dads love them? Sure they do!

They are ECO friendly

KOLORKY are made from natural and renewable materials. They aren't perfumed, do not contain chlorine or other harmful plastics. They are whitened using TCF, not bleach.

They do not cause rashes

KOLORKY aren't perfumed. They are produced from ultra-permeable fabric which enables air to circulate inside the nappy. Thanks to this, they are appropriate for babies and toddlers with sensitive skin who suffer from eczema and nappy rash.

They do not leak

The high-quality absorbent core locks all fluids and odour safely inside. The nappies are provided with a pulp layer covering the whole inner surface. As a result, KOLORKY gently absorb moisture and keep your baby's skin dry.

KOLORKY are the best! Every time we ran out of them and had to use another brand, Matthias had problems. It's obvious that KOLORKY don't contain harmful chemicals like other nappies we have used...and Matthias agrees! Plus, they are also beautiful!

”

@terezkalorencova

We love KOLORKY for their design. I often can't decide which design I prefer, so we normally open a few different packages at once, so my baby always has something different to wear. By the way, the 'overnight unicorns' are the only nappies that have managed to save us at night.

”

@krejcikova.aneta

I always try to be as environmentally friendly as I can. The best choice seemed to be cotton nappies, but that would mean a lot of washing and wasting huge amounts of water. KOLORKY are not only eco-friendly but also gentle on the bums of our beautiful kids. Since we have started using overnight nappies, I don't have to wash pyjamas every day. :-)

”

@kacanovakova

I found KOLORKY even before our baby was born. I looked for nappies with a beautiful design that are environmentally friendly, but they just weren't available in supermarket chains. We have come to love 'DELUXE' because they prevent nappy rash. We use KOLORKY 'NIGHT' because they are really absorbent, and our baby stays dry and calm the whole night long. What's more, we get to support a local Czech company that has wonderful ideas.

KOLORKY DAY NATURE

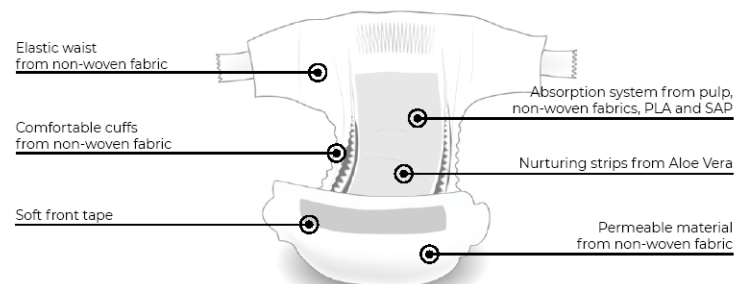

Like our other nappies, **KOLORKY DAY NATURE** help keep your baby happy and healthy. Due to the fact that we use bioplastics during production, they are even more environmentally friendly. Bioplastic is produced from corn-starch and has the same characteristics as polyethylene, but it decomposes within 4 to 5 years. Bioplastic not only decomposes quickly, but it is produced from renewable sources which is a win for the environment.

KOLORKY NIGHT

KOLORKY NIGHT place emphasis on peaceful nights for babies, their health but also environment and beautiful design. Thanks to the high absorbent layer of KOLORKY NIGHT, parents can relax knowing that their baby will stay dry in the night hours. The moisture indicator will show you when you should change the nappy. The natural and renewable materials that they are made of are gentle against a baby's sensitive skin.

KOLORKY DELUXE VELVET

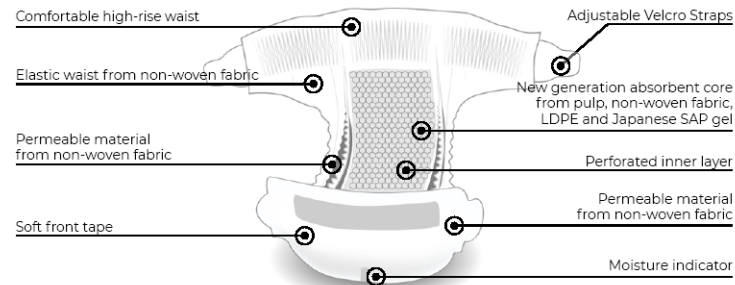

They are unique for their velvet lining that makes wearing nappies more pleasant for the baby. The inner core consists of two layers of pressed pulp with SAP gel. Thanks to pressed pulp, the nappies hold their shape and fluids spread evenly. The Japanese SAP gel is unique because of how much, and how quickly it can absorb fluid. The inner surface of the nappy is perforated, so it quickly spreads fluids and is gentler for your baby. The nappies have comfortable elastic on the back and easily adjustable adhesive tapes so that the whole nappy is better fitting. The moisture indicator will show you when you should change the nappy.

KOLORKY DELUXE VELVET PANTS

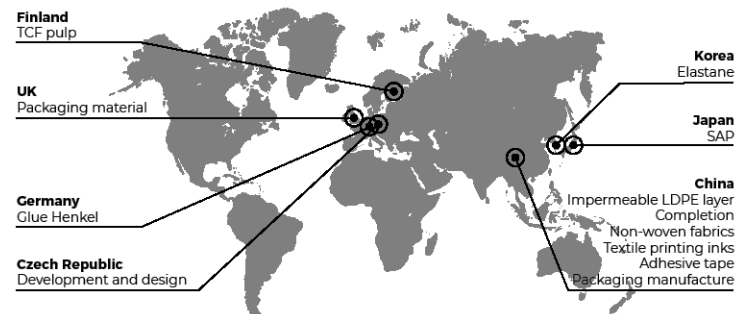

KOLORKY DELUXE VELVET PANTS are disposable nappy pants with velvet surface, new generation absorbent core and a moisture indicator. Once your baby starts moving around, nappy pants give them all the freedom they need. The panties are easy to pull up and take off - you can change them even while your little one is playing.

(love)story

www.kolorky.cz

jana@kolorky.cz

My name is Jana and KOLORKY are my beautiful colourful weakness. Everything began in July 2016, when I decided to add beautiful designs to nappies – a product that's used every day and night. Why KOLORKY? Because they bring design and beautiful colours into your and your baby's world. In July 2017, I introduced KOLORKY to the Czech market – nappies of unique design and quality. Since then, KOLORKY have come a long way. KOLORKY bring comfort and style. Your baby will stay dry and happy and their skin won't be near harmful materials. I always focus on the environment when sourcing materials for our nappies. I created them with love for children and nature, with a passion for design and beautiful things. Love them the way I do. :-)
