# Soothers

## Great selection and many possibilities

Soothers always consist of the same components – a mouth shield, a button which can be decorated, a teat, and if wished, a ring.

The single components are available in different shapes, sizes and models. Using our unique mix and match system you can create your own soother design based on your preferences.

A print on the soother's button, for example with your brand's logo, can turn a soother into your own product.

Different packaging options are available: 1 pc. blister, 2 pcs. blister as well as a 2 pcs. reusable plastic box that can also be used for sterilization.

# Mouth shields

You can choose from the following options:

**7-hole mouth shield**  
beaded or smooth  
ring only

**6-hole mouth shield**  
beaded or smooth  
with or without ring

**3-hole mouth shield**  
ring only

**2-hole mouth shield**  
with or without ring

ring for more grip

**2-hole mouth shield**  
size 0 without ring

# Soothe teats

## Shapes, sizes and materials

We offer soother teats in different shapes and sizes, made of silicone and latex, that can be combined with any mouth shield.

Size 1 is for children aged 0-6 months, size 2 is for 6-18 months and size 3 is for children aged 18 months and older. The round form is one size fits all suitable for any age.

# Soother decorations

If preferred, the soother's button can be decorated. A maximum of four Pantone colors is possible.

We will take care of an optimal print preparation in order to print your motif in the best possible way.

The 2-hole mouth shield can also be decorated with up to four Pantone colors. A surcharge would apply here.

We will provide all die-lines and norm texts in order for you to design your products and packaging in an optimal way.

We will gladly take care of product and packaging design for you. The occurring costs would then be charged to you.

# Packaging options

As standard our soothers come in a 2 pcs. blister (6 blister per trade unit). If a different packaging is preferred just let us know.

We are happy to prepare a tailored offer for you.

# Feeding bottles

## Shapes, sizes and material

Here you may also choose from a variety of components to put together your preferred feeding bottle.

Various bottle bodies in different sizes and materials exist, next to a wide range of feeding teats.

Each bottle type has a cap which closes the teat's feeding hole. This way, nothing leaks and the bottle is always ready to go.

Additionally, a handle is available for our smaller feeding bottles which transforms it into a training bottle within one step.

All feeding bottles can be assembled with a glow in the dark screw ring. This feature makes feeding at nighttime a piece of cake.

Printing with up to four Pantone colors is possible.

# Standard-neck bottles

## The classic shape

### Material

Polypropylene (PP)  
Glass

### Capacity

120 ml and 240 ml

# Feeding teats

## Latex or silicone

Feeding teats are made of silicone or latex and are available in several shapes with varying feeding holes. Different sized feeding holes have different flow rates and are designated for different foods.

Silicone feeding teats are available for standard-neck and wide-neck bottles, whereas latex feeding teats are available for standard-neck bottles.

All feeding teats are suitable for children aged 0 to 24 months.

The packaging offered is a 2 pcs. blister.

# Feeding teats

and thicker foods

# Accessories

Useful items for everyday life with a baby

They laugh, play, eat and sleep...

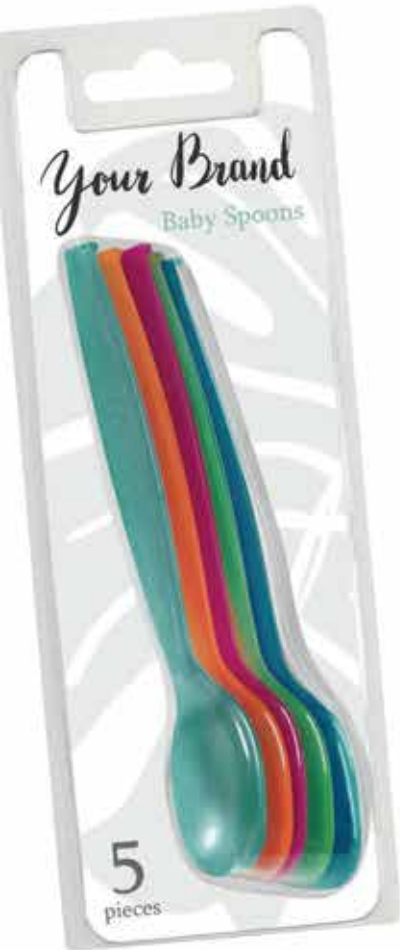

Everyday life with a baby can be exciting!  
Practical and helpful accessories can help to  
simplify life here and there.

Be it cleaning bottles with the perfect brush,  
learning how to drink independently with a leak-  
proof cup or eating mash with a baby's very  
own spoon – we have everything parents need.

# Baby Spoons

Right from the first jar of baby food, it's best to use our baby spoons. They are extra-flat for easy feeding of young babies. With their ergonomically shaped design, young children can also use these spoons to start learning to feed themselves.

These spoons come in a set of 5 and are dishwasher-proof, boiling-proof and food-safe. These spoons are made of high-quality Polypropylene (PP) and are BPA free.\*

Our spoons comply with the European Standard EN 14372.

\*according to EU Regulation 10/2011.

# Long Baby Spoons

Long baby spoons are excellent for feeding from large baby jars, since the spoon's long handle means you can easily reach the base of the jar and completely empty it.

These spoons come in a set of 3 and are dishwasher-proof. They are made of high-quality Polypropylene (PP) and are BPA free\*.

These long spoons comply with the European Standard EN 14372.

\*according to EU Regulation 10/2011.

# Heat Sensitive Spoons

The material of the spoons features a thermal sensor, which causes the spoon to discolor on contact with food that is too hot. So you can easily tell if the food has the right temperature for feeding.

These spoons are particularly suitable for large baby glasses, as their bottoms are easily accessible with the long handles.

These spoons come in a set of 3 and are dishwasher-proof. They are made of high-quality Polypropylene (PP) and are BPA free\*.

These heat sensitive spoons comply with the European Standard EN 14372.

\*according to EU Regulation 10/2011.

# Trainer Cup

With our trainer cup your child will learn to drink on their own in an easy and comfortable way.

It has ergonomic and non-slip handles which can be easily held by small children's hands. The mouthpiece is pleasantly soft and an indentation for the nose helps your child breathe while drinking.

A valve equalises the pressure in the cup and makes it more leak proof.

The protective cap provided ensures that the cup is transported hygienically when on the go.

It holds approx. 220 ml, is made from high-quality Polypropylene (PP) and is BPA free\*.

The trainer cup complies with European Standard EN 14350.

\*according to EU Regulation 10/2011.

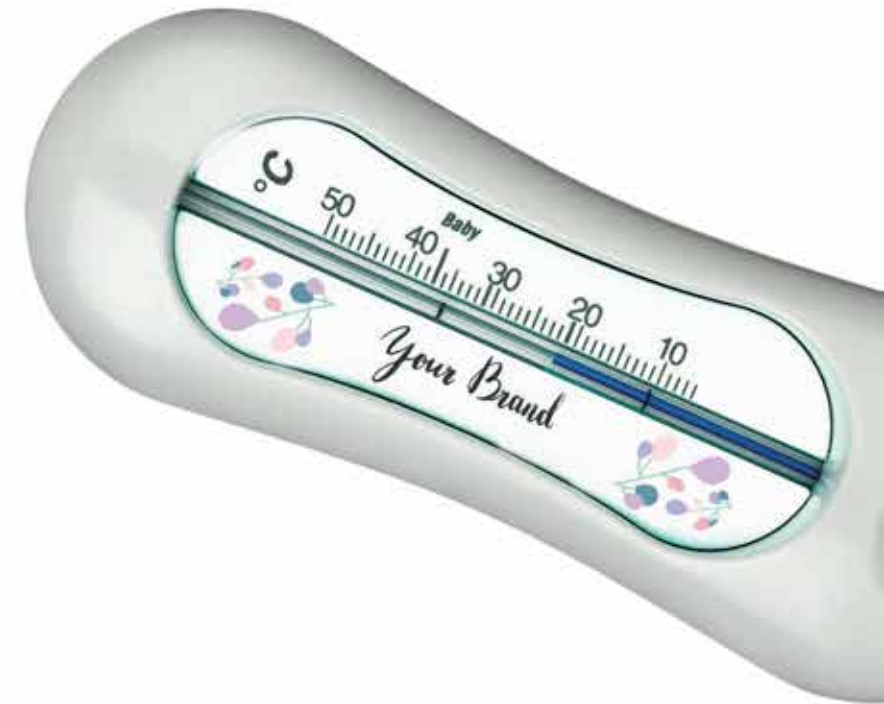

# Bath Thermometer

Babies love to take baths. However, the right bathing temperature is important. In order to achieve it, a bath thermometer is indispensable.

This bath thermometer has a large scale, ensuring that the temperature is easily readable. The perfect temperature for babies (about 37°C) is additionally marked.

The measuring fluid is made of natural and nontoxic rapeseed oil.

# Baby Scissors

## with protecting cover

In order to cut the fingernails as safely as possible, we have equipped our baby scissors with rubberized non-slip handles that provide a good grip. In addition, the scissors have rounded tips to avoid injuries.

When the scissors are not in use the supplied protective cap can be attached. Thus, the blades are securely stored and protected from any contamination.

The blades of our baby scissors are made of rust free stainless steel.

# Super Bottle and Teat Brush

Suitable for all common standard and wide-neck bottles.

The teat brush is integrated into the handle. Wear-resistant bristles and a sponge on the tip of the bottle brush ensure thorough cleaning and complete removal of food residue.

Even hard-to-get corners get cleaned easily.

# Brush & Comb Set

Especially in the beginning, baby's hair is very thin and the scalp very delicate, sensitive and tender.

An ideal and gentle care is provided by our comb & brush set. The comb has both, coarse and fine teeth, and the brush is equipped with natural bristles – for extra gentle pats.

# Soother chain

Our soother holders ensure that your child's soother is always within reach. With these holders all soothers with a ring can be attached to your baby's clothes (for clothes up to 3 mm thick).

The holder has a ring with a clip fastener that's simple to use and allows the soother's ring to be attached easily.

Made of BPA free\* materials.

Our soother holder complies with the European Standard EN 12586.

\*according to EU Regulation

# Soft Teether

When babies start to teethe, teethers can be a soothing and welcome relief for your child and help to ease the soreness.

The small knobs on the surface can alleviate pain during teething.

This teether is made of BPA free\* material and is suitable for babies from the age of 3 months and up.

This article complies with the European Standard EN 71.

\*according to EU Regulation
